DDMS™ Diamond Dusted Membrane Scrapers

The Diamond-dusted, soft, silicone tip has been designed to identify and lift the edge of the membrane quickly and easily for your forceps. Available in several styles, including a retractable version, the patented DDMS has become a staple in operating rooms around the world.

DDMS benefits:

- Aids in the atraumatic removal of immature membranes and pigmented cells from the retina
- Assists atraumatic separation of hyaloids from neurosensory retina
- Especially beneficial for relieving traction from the rim of macular holes or retinal breaks in an atraumatic fashion
